

Agility in Chaos!

Scrum Day India - Gurugram, July 20th 2019

Reflections!

- I do sprint planning
- I help the team be more effective by removing blockers
- I help achieve quality objectives
- I facilitate daily scrum and sprint planning
- I manage the product backlog
- Protect the team from distractions and waste of time
- I work closely with Product Owner
- Motivates and binds the team together

- We used to do it and even today we are giving all the inputs, you just update the excel
- How can you when you don't even understand the dependencies?
- Just focus on getting everything on JIRA.
- Daily scrum are ceremonial and waste of time!
- It is just a dairy entry.
- What about those 4 hour retrospectives and entire team attending 2 hours long demo?
- You just listen to what product owner is saying!
- I have never seen you challenging bad behaviours!

Are we able to embrace CHAOS?

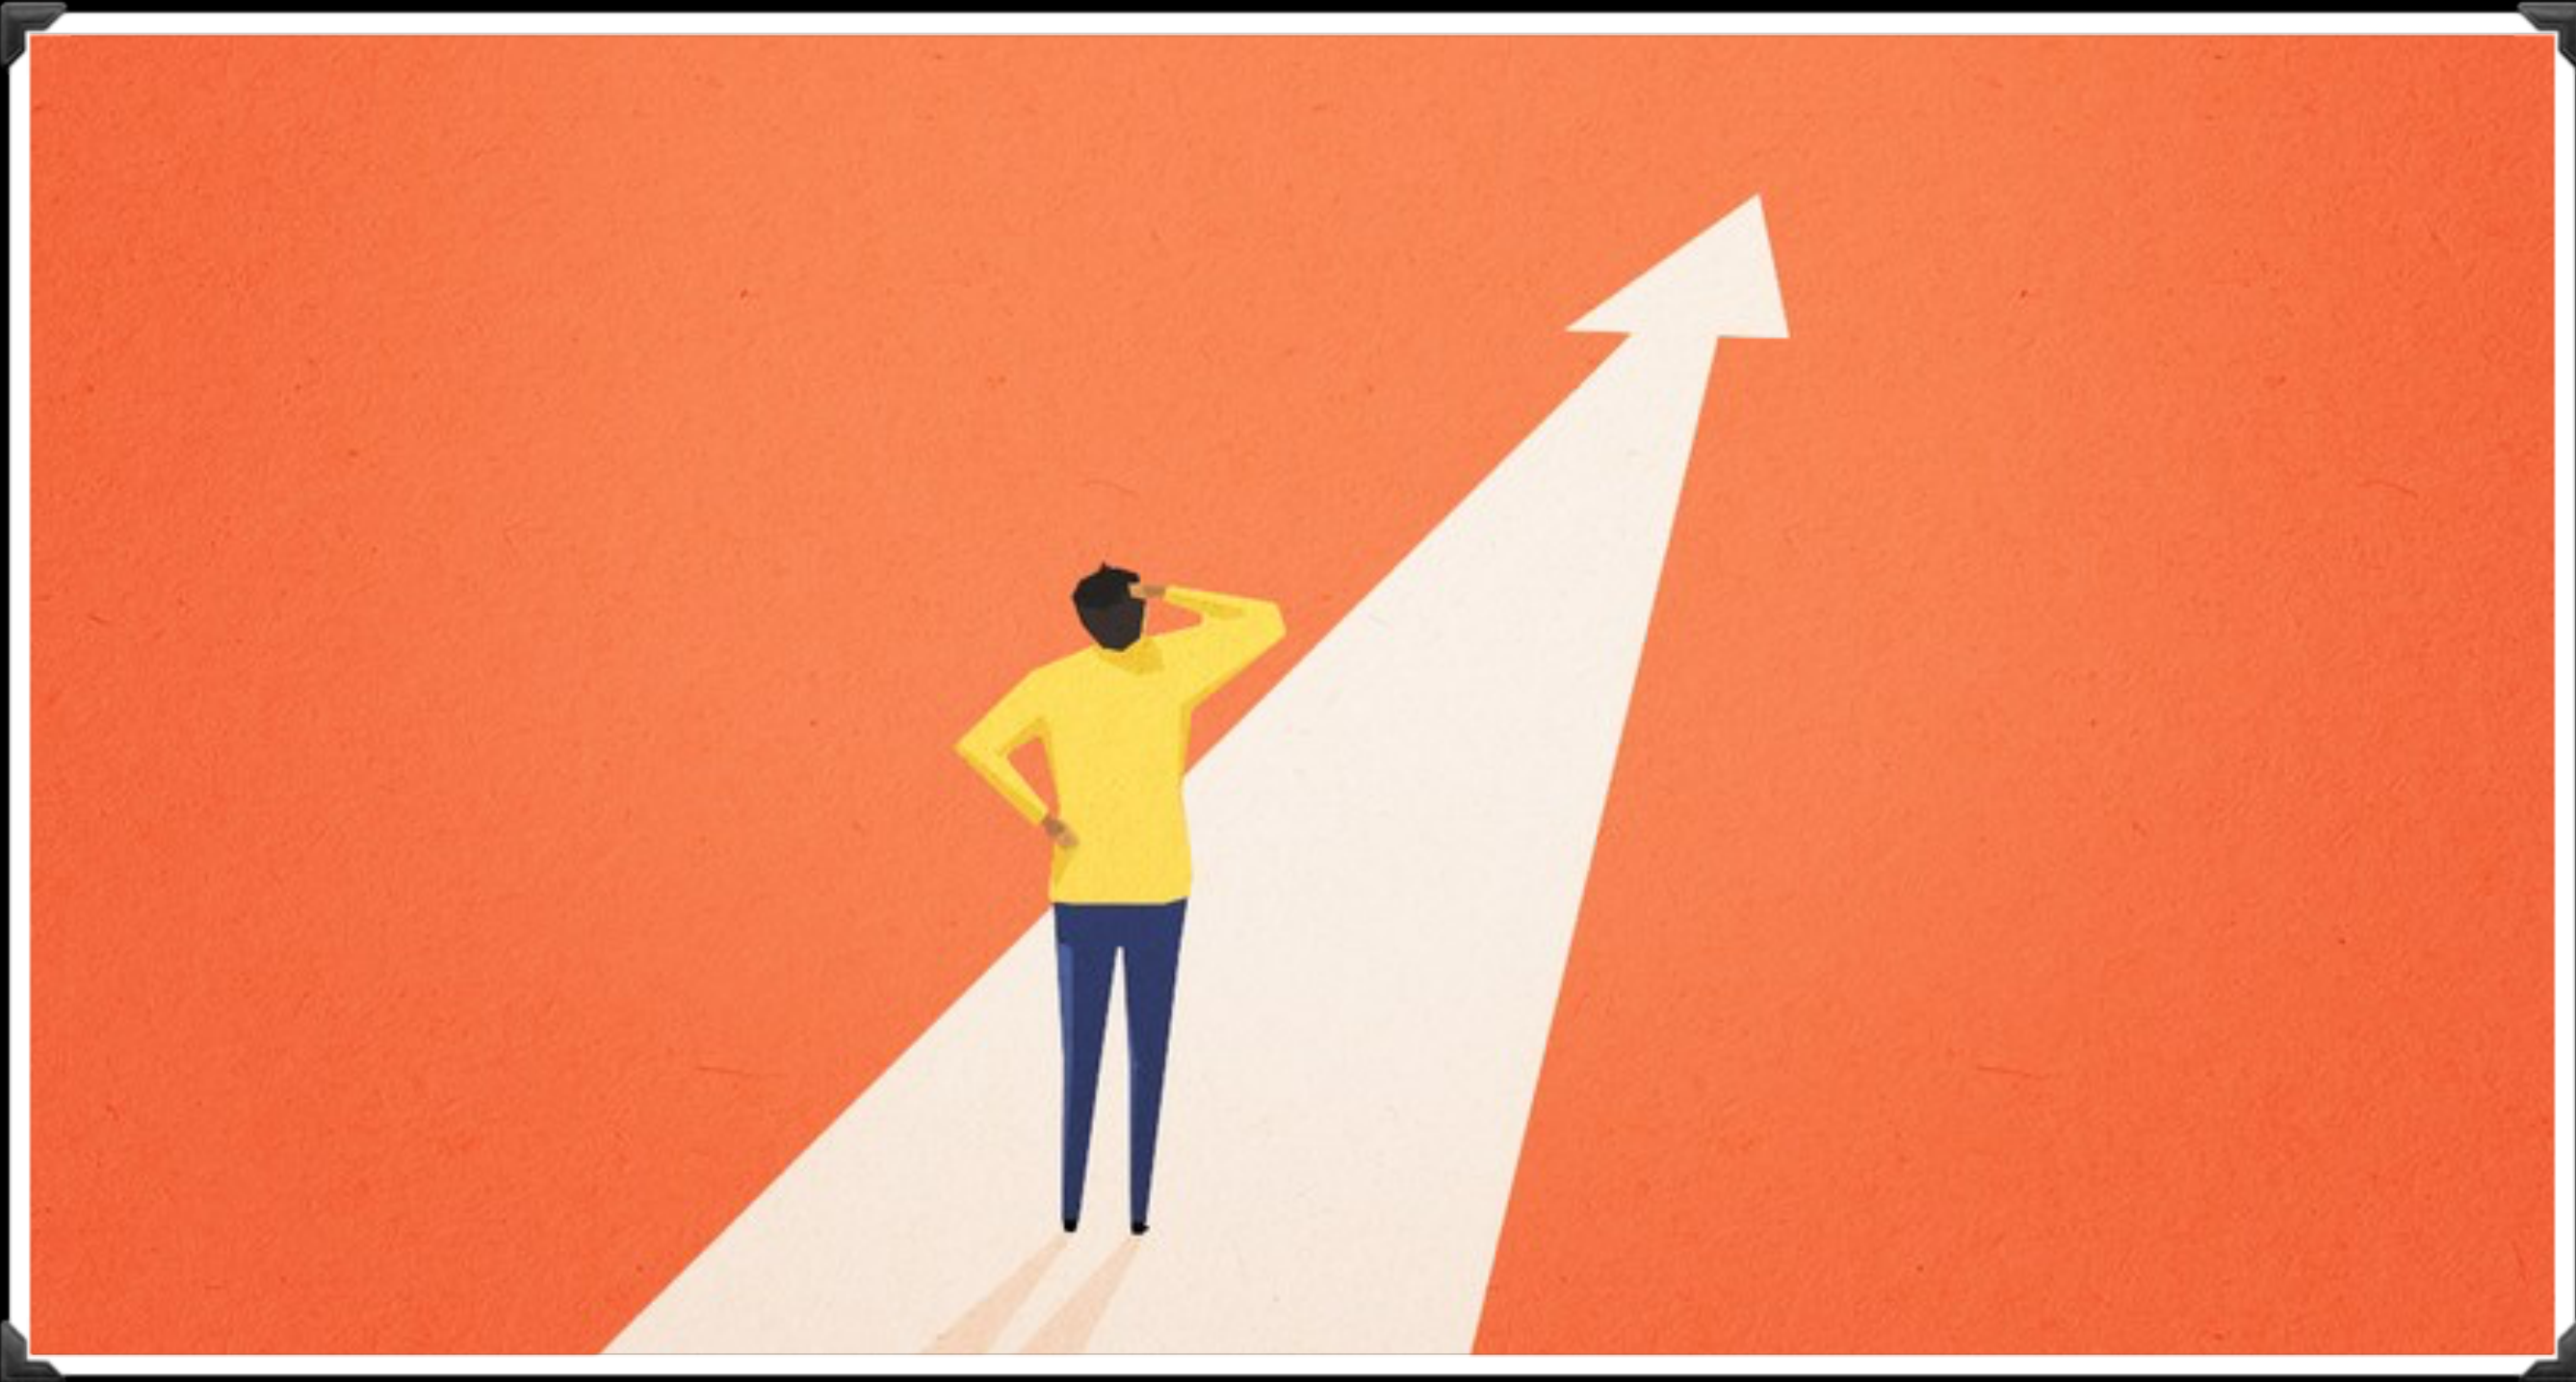

Getting the basics right!

Give a sense of purpose to team

Emphasise vision that is powerful yet personal!

Create a healthy environment full of fun
